ELECTRIC POWER LINES AND GRAIN BINS DON'T MIX!

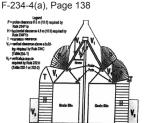

Please contact your local electric cooperative/utility if you plan to build a grain bin in the vicinity of an electric distribution line or electric transmission line.

Dairvland Power Cooperative owns and operates transmission lines in Northeastern Iowa, which provide electrical energy to local rural electric cooperatives and municipalities. Those transmission lines are operated at voltages that greatly exceed local distribution and service lines that may be located on your property. Dairyland will provide assistance in planning the placement of the grain bin near our transmission line to provide a safe environment for everyone working and living around

The State of Iowa requires specific clearances for electric lines around grain bins, with different standards for those filled by portable and permanent augers, conveyors and elevators. The drawings show specific clearances required for each
